The philosophical notion of time is difficult for little ones to understand, but it is portrayed here simply, delicately and poetically through He Zhihong's Chinese-style paintings. When the fire finally goes out, a child sifts through the ashes and finds a scrap of paper that has resisted the flames.

On it is a line of poetry that reads: "O wonder, a garden in the flames." Overcoming his fear, he copies it onto the palace walls. The crowd starts to imitate him, writing down all the words they can think of before they disappear from memory. The weight of these words leads to the collapse of the palace walls – and of the tyrant.

Comments of the Jury :

« This book follows the history of just one side of the street over more than a century, from 1890 to 2018. The book's subtitle, a history of migrations, is a clue to the book's main idea: how migrants enrich communities. Each spread introduces new characters from many countries who contribute to the life of the street in different ways. The horizontal layout is functional to the streetscape subject [...] The clever, clearly defined scenarios use a variation-on-theme technique to show the passing of time, inviting the reader to linger over changing details like clothing, car design, advertisements and shop signs. »
